

PÊCHE

Redness Control Formulated with ROSAPLEX™

Skin redness is nature's way of telling you there is a problem.

Skin redness has many causes, but it's a clear signal that something may not be quite right. Cutting edge research shows that changes in skin's natural anti-microbial peptides may be to blame in certain skin conditions. The result is skin redness which can be bothersome.

Redness Therapy:

Skin redness can be treated with prescription medication, but skincare is recognized as an important component of the therapy to help manage skin redness.

Pêche, with exclusive patent pending ROSAPLEX™ is formulated with 4 targeted skin care ingredients to help restore balance to upset skin. The result: **the signs of skin redness are visibly diminished**. Skin appears more even toned, calmer and vibrant.

Serum with patent pending ROSAPLEX™ helps manage skin redness for a more balanced complexion.

ROSAPLEX™ is an exclusive redness balancing complex, fortified with Dextran Sulfate, Zinc, Caffeine and Glycerin to help minimize the appearance of blotchiness, blemishes and improve overall skin tone.

PÊCHE helps to:

- Visibly diminish the appearance of skin redness for a healthy glow.
- Restore skin's natural moisture balance and helps strengthen the skin.
- Improve the appearance of skin blotchiness
- Limit the appearance of blemishes
- Soothe and comfort

PÊCHE can be applied AM/PM as adjunctive skincare along with medication or as a part of a maintenance regimen for the management of skin redness.

Use of JOURNÉE Bio-restorative Day Cream SPF 30+ during the day is recommended.
