

Teamine[®] Eye Complex

Advanced Technology for Dark Circles

Since there is not one single cause of dark circles, Teamine[®] was formulated to effectively address dark circles in multiple ways while providing anti-aging benefits.

- Visibly diminishes dark under-eye circles
- Reduces the appearance of puffiness around eyes
- Smooths fine lines and wrinkles
- **Firms and brightens** skin and provides **antioxidant benefits**

How to Use

- Teamine[®] is a concentrated cream, so a very small amount is needed. Apply under eye area along the orbital bone **twice a day** after cleansing. Gently apply with ring finger from the inner corner of the eye outward up to the brow bone. Results should be seen in 4-8 weeks with twice daily use.

Frequently Asked Questions

1. **Why do I have dark circles?** There are several factors that lead to dark circles, including genetics, age, allergies and lack of sleep. Teamine[®] contains ingredients to improve the appearance of dark circles no matter what the cause.
2. **Do any ingredients provide an immediate brightening effect?** Yes. Natural minerals, Mica, Silica and Titanium Dioxide, help to immediately brighten the skin and diffuse light to minimize the look of fine lines.
3. **How is Teamine[®] Eye Complex different from Teamine Concealer™?** Teamine Concealer™ was designed to provide tinted coverage for dark circles while Teamine[®] Eye Complex does not. Both address dark circles through multiple pathways, provide anti-aging benefits and contain Green Tea and THD Ascorbate. The peptides, antioxidants, vitamins and extracts vary by formulation.

Ingredient Highlights

- **Palmitoyl Pentapeptide-4.** Increases collagen to reduce fine lines and wrinkles.
- **Grape Seed Oil & Green Tea Extract.** Provides antioxidant benefits & strengthens capillaries.
- **Vitamin C (THD Ascorbate).** Brightens skin and provides antioxidant benefits.
- **Sodium Hyaluronate.** Hydrates and moisturizes without oil.
- **Mica, Silica & Titanium Dioxide.** Instantly brightens skin.
- Also contains **Vitamin K, Horse Chestnut, Arnica Montana Extract, Caffeine** and multiple antioxidants.

Teamine Concealer™

Anti-Aging Complex for Dark Circles. Available in LIGHT, MEDIUM, and DARK!

We've got dark circles covered with NEW Teamine Concealer™. Available in LIGHT, MEDIUM, and DARK shades, this three-in-one formula conceals dark under-eye circles while it works to reduce their appearance.

- **Instantly conceals** imperfections while brightening the under-eye area
- Diminishes the appearance of dark circles
- Reduces fine lines, wrinkles and puffiness
- **Pairs perfectly with Teamine® Eye Complex**

How to Use

- Pat a very small amount under eyes and blend. Apply more if needed for added coverage.

Ingredient Highlights

- **Troloxerutin.** A potent, purified antioxidant that strengthens capillaries to prevent poor circulation and dark circles.
- **Chrysin.** Improves dark circles by activating a pigment reducing enzyme and eliminating iron deposits underneath the skin.
- **Dihydroxymethylchromone (DHMC).** Anti-aging ingredient that provides Retinol-like benefits without the irritation.
- **Brazilian Ginseng, Marapuama & White Lily Extract.** Reduces the appearance of dark circles by decreasing inflammatory response and improving circulation.
- **Caprooyl Tetrapeptide-3.** Reduces fine lines and wrinkles by enhancing the dermal-epidermal junction (DEJ).
 - The DEJ is the area where your dermis connects to your epidermis and is responsible for healthy communication between skin layers. The DEJ also exchanges nutrients back and forth from the epidermis to the dermis. Without this nutrient exchange, skin would suffer premature aging and damage.
- **Vitamin C (THD Ascorbate).** Brightens skin and provides powerful antioxidant benefits.
- **Green Tea Extract.** Provides strong antioxidant benefits while soothing the skin.

Should I use Teamine Concealer™ instead of Teamine® Eye Complex?

You can use Teamine Concealer™ in the morning and Teamine® Eye Complex at night. **We recommend using Teamine® Eye Complex both morning and night and layering Teamine Concealer™ during the daytime** (apply Teamine® Eye Complex first and follow with Teamine Concealer™). The formulas contain different ingredients and technology, so when used together, they will provide enhanced results.
